

Tee Purge Assemblies

Model P5

Model P5 Tee Purge Assemblies have been designed to be used as a complete assembly between the regulator and the cylinder outlet. They have a 1/4" NPT Male connection that can be assembled into the regulator inlet port in place of the normal cylinder fitting.

Model Number	Description
Q4-P53-(*)	Brass with Packless Valve
Q4-P54-(*)	Stainless Steel with Packless Valve

* Specify CGA. Other cylinder connections are available – please contact your Air Liquide representative.
